

Interesting Plots!

The "Crop Testing Plan," now in its eleventh year of work, has up to the present produced a large number of plots of wheat, oats, barley and flax, some of which are now being planted in the field. The average results of the tests are being compared with the results of the tests of the same crops in other parts of the province.

Any farmer would benefit by visiting these plots.

The location of the plot nearest to you, in the South-West, is at the following address:

SEARLE GRAIN COMPANY, LTD.

THE WORLD'S GOOD NEWS
THE CHRISTIAN SCIENCE MONITOR

It is the only paper in the world which contains the most complete and up-to-date news of the world. It is the only paper which contains the most complete and up-to-date news of the world. It is the only paper which contains the most complete and up-to-date news of the world.

ANEMIA

The common symptom of anemia is shortness of breath, which is accompanied by a feeling of weakness and a feeling of tiredness.

It is a condition of the blood, and is caused by a deficiency of the red blood cells, which are the carriers of oxygen to the tissues.
